Introduction:

What is IPR?

Intellectual property rights (IPR) refers to the legal rights given to the inventor or creator to protect his invention or creation for a certain period of time.[1] These legal rights confer an exclusive right to the inventor/creator or his assignee to fully utilize his invention/creation for a given period of time.

About The Webinar:

The webinar is aimed to generate awareness about Intellectual Property Rights (IPR) in all the Sectors, thereby furnishing requisite guidance and proficiency about an assortment of procedures of **copyrights, patents, trademarks, and publicity rights search and application filing**. The Webinar is indeed a podium to foster pioneering minds amid participants and identification of protectable innovations. Intellectual Property Rights (IPR) is set of rights associated with intangible creations of the human intellect. It covers laws related to copyrights, patents, trademarks, and publicity rights. The foremost purpose of intellectual property is to encourage the creation of a large variety of intellectual goods. The webinar would focus on national innovation and start up polices (National Innovation and Startup Policy (NISP) for HEIs. It will also take into consideration International Acceleration Program for Early Stage Startups.

In today's globally competitive environment, intellectual property has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance.

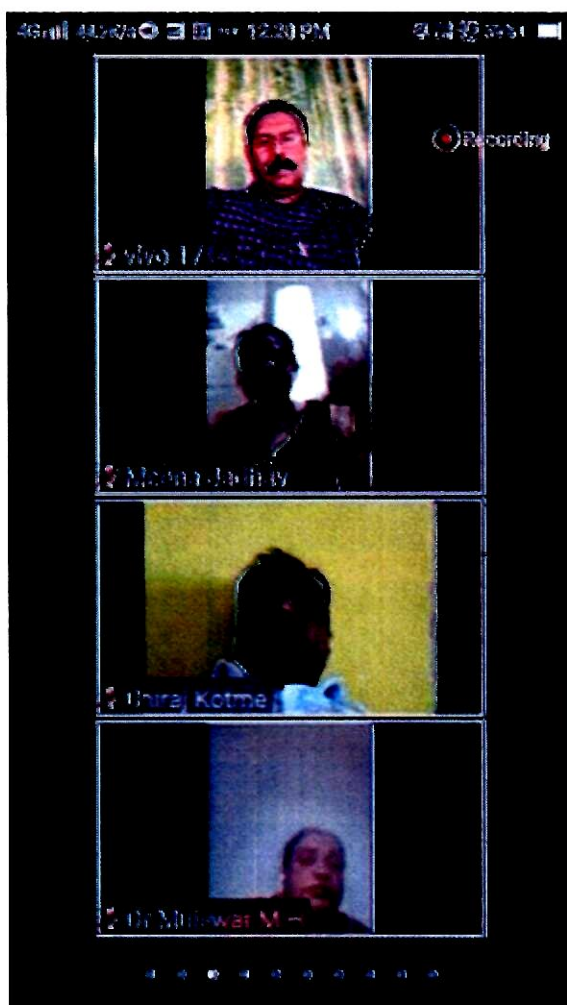

On the above backdrop, **IQAC & Zoology Department of Jawahar Arts, Science & Commerce College, Anadur, Taluka- Tuljapur, Dist- Osmanabad** in association with the **Kumar Swami Mahavidyalay, Ausa, Dist- Latur** organised a three webinars on "**Intellectual Property Rights**" 8th & 9th May 2020 on **ZOOM** platform.

The focus of the seminar was to promote the creation, protection & enforcement of the Intellectual Property Rights amongst various stakeholders.

Objectives:

- To acquaint the participants with basics of intellectual property rights and patent filing
- To compare and contrast the different forms of intellectual property protection in terms of their key differences and similarities.

- To provide an overview of the statutory, procedural, and case law underlining these processes and their interplay with litigation.
- To encourage young buddies for innovation for 'Make in India' programme.
- To aware the participants with the various funding platform and facilities under Institution's Innovation Council.
- To sensitize the clusters about Intellectual Property Right and their protection.
- To identify protectable innovations.
- To suggest steps for transforming innovations into proprietary assets. –
- To use IP information, particularly relating to patents and designs, for further research and development in developing new product and process.

About The Speaker:

A Webinar was organized on behalf of **IQAC and Zoology Department** of our **Jawahar College on 8th & 9th May 2020 during the lock down period** to inform the research students and teachers about Intellectual Property Right (IPR) & Patent Filing.

Principal Dr. Umakant Chanshetti was made formal opening of this Online Webinar and welcomed to all participating researchers, teachers and parents.

The organizer of this Webinar on Prof. Dr. Siddheshwar Bad introduced the guests while IQAC Coordinator Prof. Dr. Vishwas Mane explained the rationale for holding this webinar in the introduction.

After this, Principal Dr. M. M. Betkar started his presentation.

In this he gave detailed guidance on the following topics.

Intellectual Property Right (IPR): Meaning, Related Laws and Valuation

What is Intellectual Property Right (IPR)?

- Intellectual property means creations of the intellect for which a monopoly is assigned to designated owners by law.

Intellectual property (IP) refers to creations of the intellect for which a monopoly is assigned to designated owners by law. Intellectual property rights (IPRs) are the protections granted to the creators of IP, and include trademarks, copyright, patents, industrial design rights, and in some jurisdictions trade secrets. Artistic works including

Principal
Jawahar Arts, Science & Commerce College,
Anadur Tal. Tuljapur Dist, Osmanabad

music and literature, as well as discoveries, inventions, words, phrases, symbols, and designs can all be protected as intellectual property.

Intellectual property rights (IPR) include patents, copyright, industrial design rights, trademarks, plant variety rights, trade dress, geographical indications, and in some jurisdictions trade secrets. There are also more specialized or derived varieties of sui generis exclusive rights, such as circuit design rights (called mask work rights in the US) and supplementary protection certificates for pharmaceutical products (after expiry of a patent protecting them) and database rights (in European law).

What are IPRs?

- The protections granted to the creators of IP. IPRs include trademarks, copyright, patents, industrial design rights, and in some jurisdictions trade secrets.

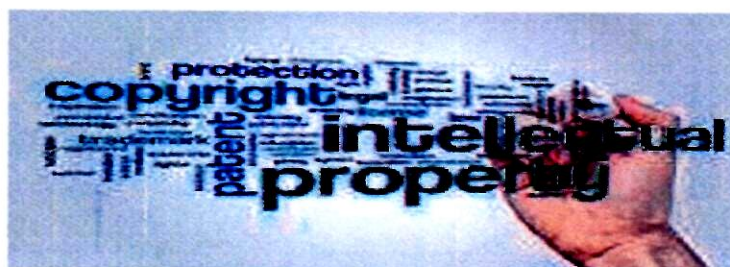

What all can be protected?

- Artistic works including music and literature, as well as discoveries, inventions, words, phrases, symbols, and designs.

Steps to secure an IP?

The First Step is through registration

Depending on the nature of service/product one can register their services and products as:

Principal

Jawahar Arts, Science & Commerce College,
Anadur Tal. Tuljapur Dist, Osmanabad

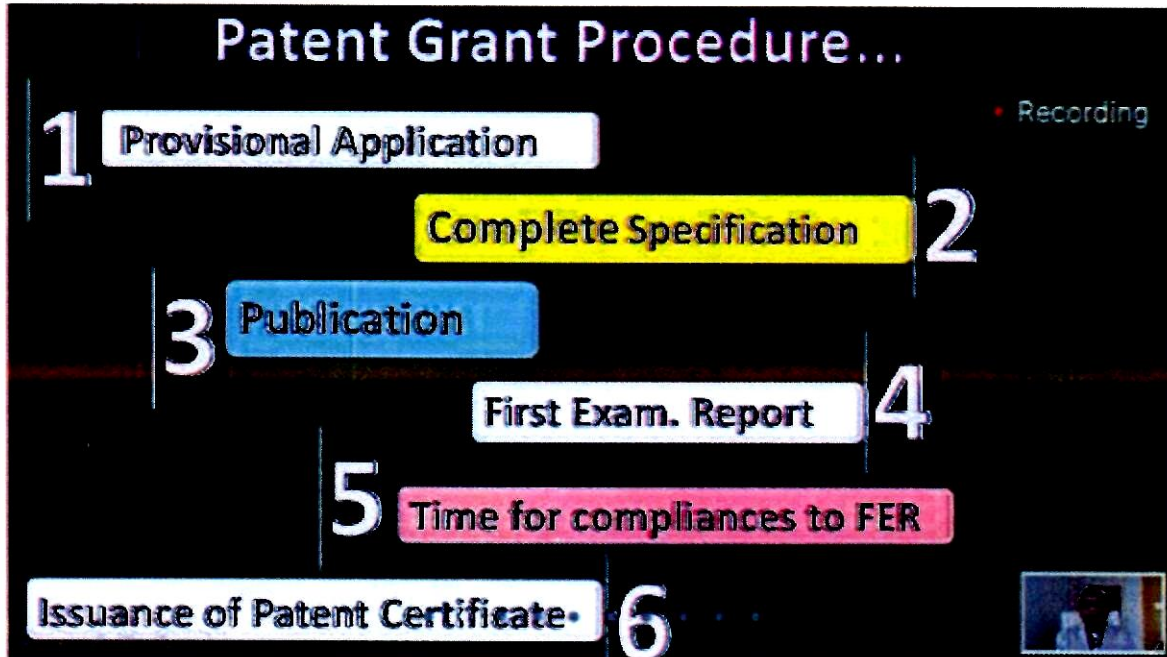

Protection for Copyright

What's the Protection?

- Protection given by law for a term of years to the composer, author etc... to make copies of their work..

What's the Scope of work for Protection?

- Work includes literary, artistic, musical, films, sound recordings, and broadcasts.

What's the term of registration?

- The term of registration of a copyright for literary, artistic, musical, dramatic work is lifetime +60 years from the beginning of the calendar year next following the year in which the author dies and in other cases until sixty years from the beginning of the calendar years next following the year in which the work is first published.

What's a Trademark?

- A symbol, word, or words legally registered or established by use as representing a company or product.

What is Patent?

- A patent is a limited right granted by the government (all patents are limited by country) that allows the inventor to stop other people or companies from making, using or selling a specifically defined invention

Protection for Patent

Basic idea of granting a patent

"The applicant applies to the government for the right of patent and in return for the monopoly given he must disclose everything about the invention in the patent document"

Timeframe for patent?

- Patent is granted for duration of 20 years.
- Priority date- first to file

Scope?

- Patent is for invention, it can either be applied for a product or process
- A Must have for patent
- Patentable invention must be new, involves an inventive step and industrially applicable
- Protection for industrial design

What it covers?

- Protection for industrial designs/research/innovations that are new or original

Defining Design

- Design are feature of shape, configuration, pattern or ornament

Application

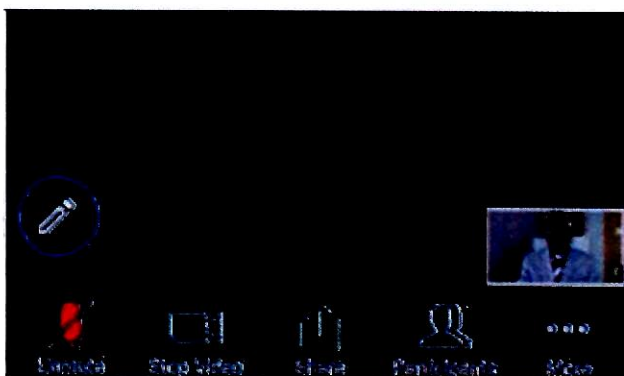

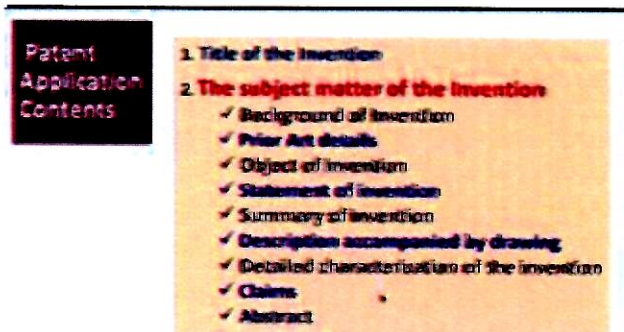

- The design must be applied to an article
- The design must be applied by an industrial process.
- Appeal to the eye.

Protecting IPs through agreements against theft

How can IP's be safeguarded through agreements?

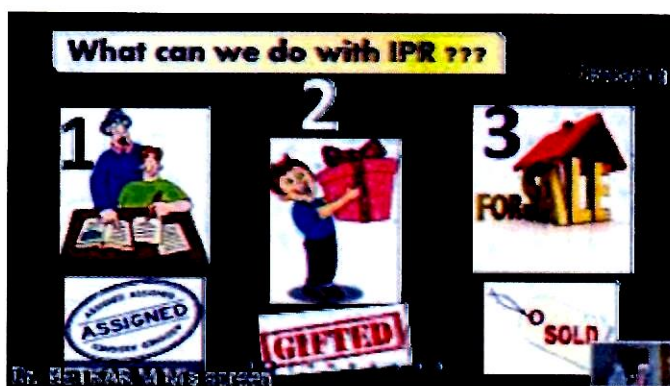

Another step in seeking IP protection against theft is executing comprehensive employment agreements and non-disclosure and IP assignment agreements with clauses on non-compete, confidentiality, non-solicitation, IP protection, assignment of inventions/IP, work for hire, etc.

Special Case – Licensing to third party when licensing any IP to a third party, a detailed licensing/sub-licensing agreement must be executed.

Various Laws for Intellectual property Protection in India

- The Trade and Merchandise Marks Act, 1999
- The Copyright Act, 1957 has been amended to protect computer programs as "literary work";
- The Patent Act, 2005.
- The Designs Act of 2000.
- The Geographical Indications of Goods (Registration and protection) Act, 1999;
- The Semiconductor Integrated Circuits Layout Design Act, 2000;

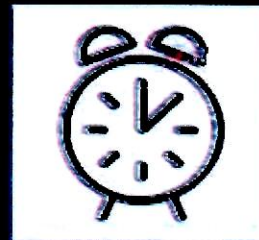

- The Protection of Plants & Varieties and Farmers Rights Act, 2001;
- The Biological Diversity Act, 2002

Valuation of Intellectual property

What's the value of an IP?

The value of an IP is a monetary compensation that is expected to be received from licensing of an IP or from sale or exchange of other intangible assets.

TERM of IPRs		
PATENT	20 Y	
Copyright	70 Y	
Designs	15 Y	
Trade mark	10 Y	(Unlimited if renewed after every 10 Y)
Plant Breeder	Field crops	15 Y

How new is this concept?

The concept of valuation of intellectual property and other intangible assets of a company is new as compared to other concepts of intellectual property (IP) law.

Cost based valuation

- **What is it based on?**

It can either be based on historic cost or on replacement cost. A historic cost is the actual cost of creating an IP. Replacement cost is the cost to replace the asset. It is determined as to what will be the cost of creating a new trademark or a patent.

IPR filing offices

1. Mumbai
2. Chennai
3. New Delhi
4. Kolkata

What are the drawbacks?

This method is not recommended as there is no correlation between expenditure and subsequent value of asset. E.g. a product promoted at huge cost does not appeal the customers.

A major drawback of this method is that it is not possible to determine an exact future cost.

Market based valuation

- **What is it based on?**

This method can be based on the market price comparability or on comparable royal rate. Market price comparability- the value of an IP is determined on the basis of price of comparable IP products.

- **How is the evaluation done?**

Evaluation is done through comparable royal rates.

This requires construction of a business plan around an IP. The resulting return is then compared to the price of being owner of the asset. If the price is higher than the return, it is recommended not to buy the asset.

Principal
 Jawahar Arts, Science & Commerce College,
 Anadur Tal. Tuljapur Dist, Osmanabad

Economic based valuation

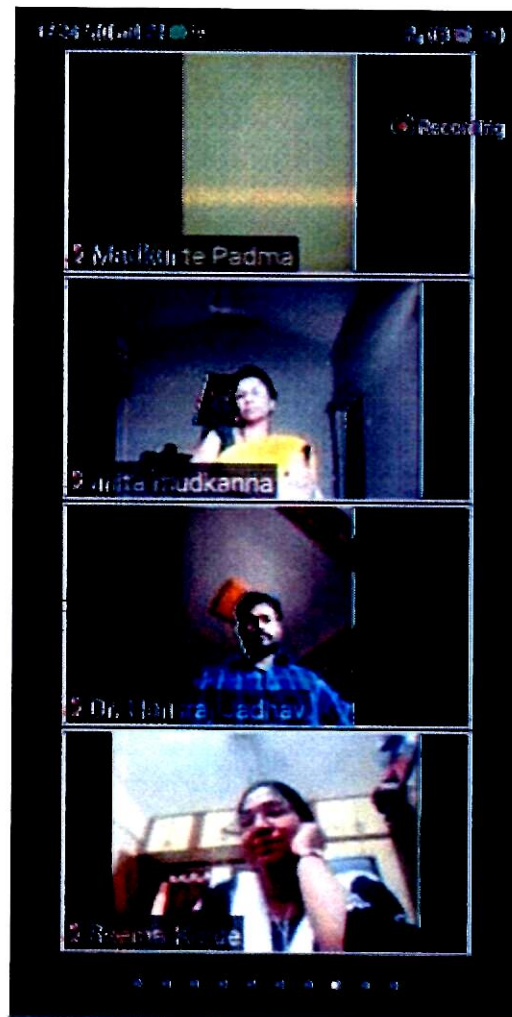

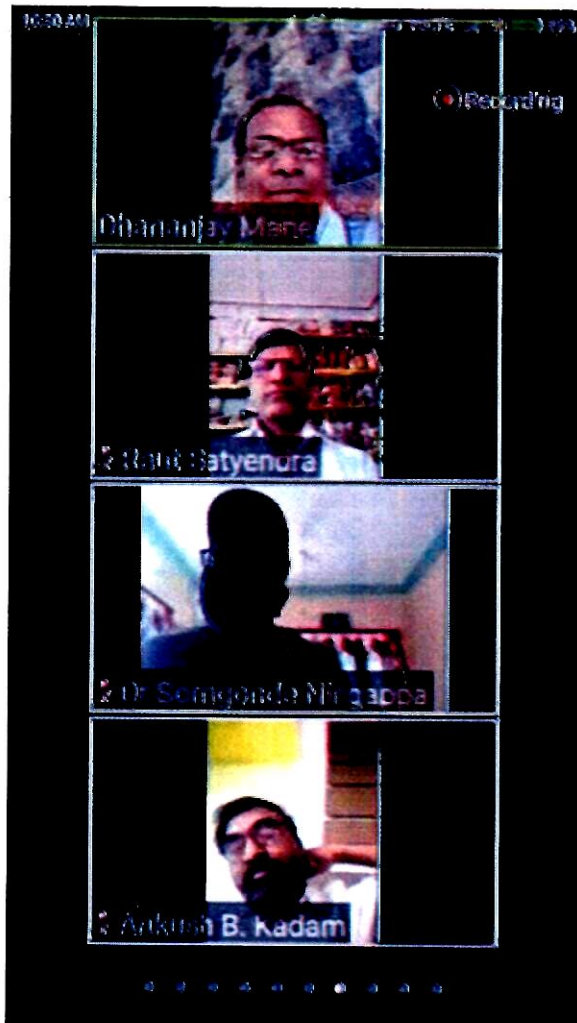

What is it based on?

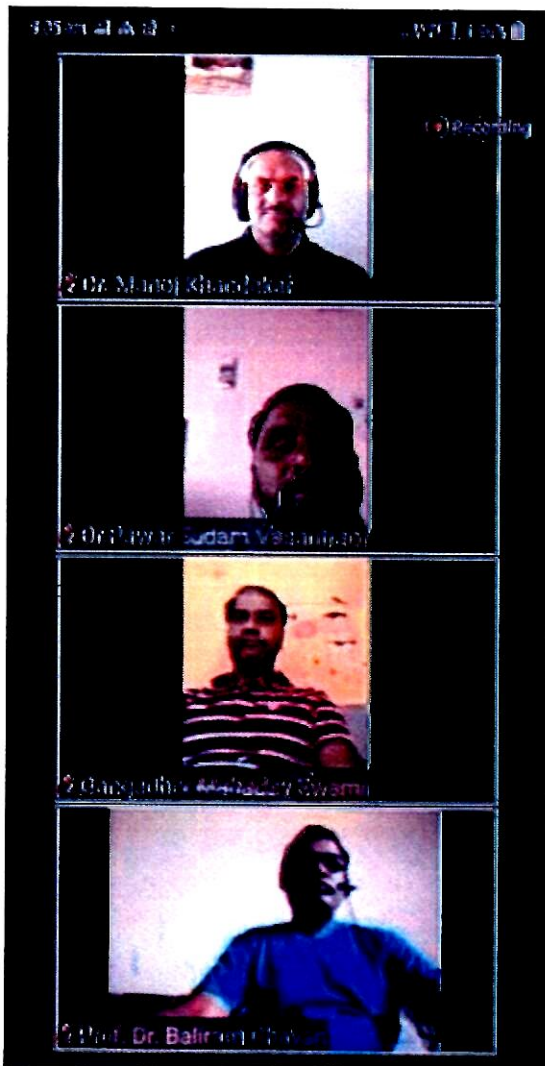

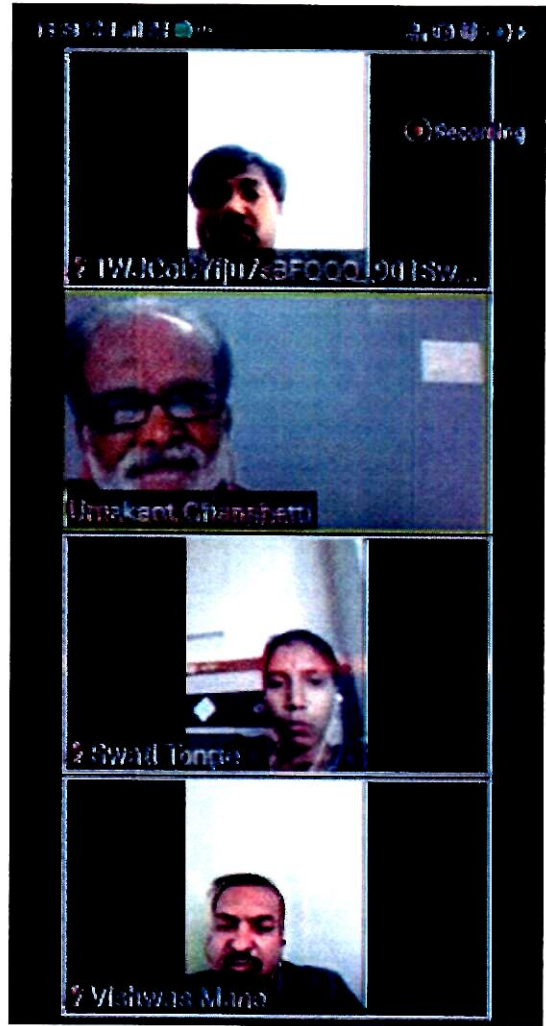

This method requires identification, separation and quantification of cash flow or royalty fees to IP and then the capitalization of future cash flow. Quantifying the future revenue stream can be done in view of exploited or unexploited IP.

Renewal Fee of a Patent

Term in Yrs	Fee in Rs.
0-2	00
3-6	2000
7-10	6000
11-15	12000
16-20	20,000
