Internal Quality Assurance Cell (IQAC)

Introduction:

A comprehensive Perspective plan is being produced for the library's overall development, as recommended by the NAAC Committee in the past. It includes a suggested library building construction design, increased book collection for competitive exams, academic assistance, subscriptions to online e-resources, user education programmes, and the creation of a college database and institutional repository, among other things.

Perspective /Strategic Plan of

Department of Library

Jawahar Arts, Science & Commerce College, Anadur

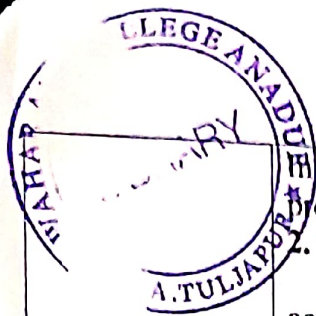

Plan of Action for the Year	2018-2023
------------------------------------	------------------

1. Library Building
2. Library Networking & Internet facility.
3. Increase the number of books in the library for competitive exam.
4. To establish carrier academic.
5. Digital Consortium.
6. Library promotion through library website.
7. User Education
8. Building College Database.
9. Building Institutional Repository
10. May I help you – Library Service.

Year wise Plan of Action

Academic Year	Work to plan
2018-19	<p>1. Library Building: A well-designed library building is one of the most basic requirements of any academic library. As a result, our management has chosen to construct a library building in accordance with industry standards. The library building should consist of Librarians cabin; Stack Room and reading room cum seminar hall.</p> <p>2. Library Networking & Internet facility: Our library is automated with SOUL software, which is a multiuser network-based system that requires LAN networking. Nowadays, many resources are available in electronic format, which necessitates the usage of an internet connection. As a result, these two facilities should be operational soon.</p>
2019-20	<p>1. Increase the number of books in the library for competitive exams. Students nowadays are mostly studying for competitive tests. As a result, books are purchased in accordance with various requirements for various tests.</p> <p>2. To establish carrier academy: Because it is clear that the majority of college students are enrolling elsewhere for competitive exam preparation, it is vital to construct a carrier academy to prevent student migration and provide them with a good learning environment. This carrier academy receives the library's full support for teaching and learning. It provides a syllabus, books, and exam papers, as well as database management assistance.</p>
2020-21	<p>1. Digital Consortium: Nowadays, the majority of information sources are electronic. These sources are digitally preserved and delivered via the internet. A digital consortium is an example of resource sharing in which a group of publishers banded together and agreed to share their published journals and provide end users with a single point of entry. The institute is planning to subscribe such digital consortium named N-List which is established by INFLIBNET Centre, Ahmedabad Gujrat.</p> <p>2. Library Promotion through Library Website. Although library marketing is an established practise, in this modern era of technology, library promotion is more widespread and successful through the use of a library website. It is a very effective tool for promoting various library programmes and enticing users to use the library. Our institute intends to create a full-featured library website.</p>
2021-22	<p>1. User Education: A significant change in library organisation has happened as a result of the effect of information technology. Users are unable to locate the information they require within the library on their own. As a result, user education is critical for users to find information that is relevant to them.</p>

	<p>In a given academic year, our institute plans to host two user education programmes.</p> <p>2. Building College database:</p> <p>Many of the preset formats are required in day-to-day college activities, such as Admission form, Library membership form, Bonafide, degree form, T.C. application form, no-dues form, and so on. All of these will be kept under one roof by the library. As a result, the institute intends to create such a database.</p>
2022-23	<p>1. Building Institutional Repository:</p> <p>The institute's faculty members produce journal articles in a variety of scholarly journals. All of these publications have been published in various journals; therefore, each institute will need to create an institutional repository to bring them all together. Which is the Institute's intellectual property.</p> <p>2. May I help You – Library Service:</p> <p>May I help you is a type of service in which library professionals give personal library services. It includes the creation of a tailored database based on the user's requirements. It also supplies some pre-made or customised information for their short-term requirements.</p>
